Christy/Myra, please see the revised laboratory request forms for Wilcox Oil Company sampling schedule for the weeks of October 24, 2016 and October 31, 2016.

Please note:

1. Week October 24: the volatile soils will be collected using the Encore 3 gram coring tool with an estimate of 165 low concentration soils.
2. Week October 31: The background soil sample will not be sent to Houston/CLP; therefore, the total number is reduced to 150 and includes removal of the dioxin/furan and hexavalent chromium.
3. Week October 31: the volatile soils will be collected using the Encore 3 gram coring tool with an estimate of 165 low concentration soils.
4. Week October 31: all waters will be collected during this week.

Thanks for the help.
